## THE NEW CAMPUS VERITATI

### MORE THAN AN EXPANSION

The expansion of the Campus to the North will see two new buildings rise – one for Católica Lisbon School of Business & Economics, doubling its capacity with higher quality, and a multi-purpose building that will house the Rectory and a Great Conference Center – architectural icons that express the way the University wants to shape the future.

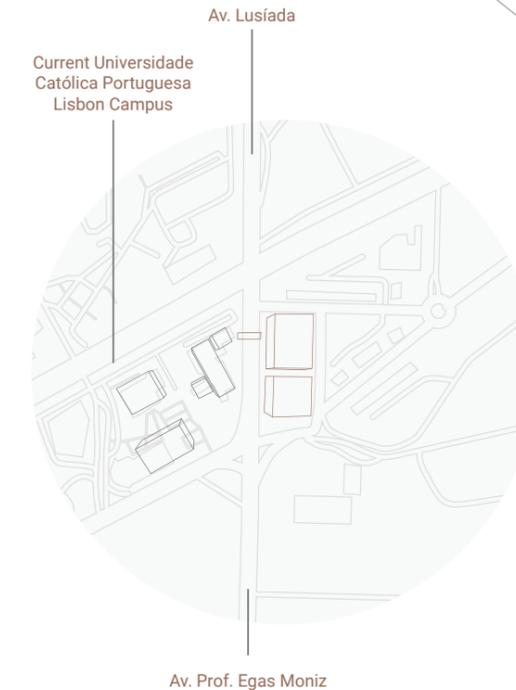

It will also allow the expansion of the other schools of Lisbon, in a true University Campus, with green and sustainable spaces, in a multicultural environment conducive of promising careers, where contact networks are built for life and the academic experience will surely be memorable.

### GROWTH WITH A PURPOSE

In the heart of Lisbon the Universidade Católica Campus is reinventing itself. Our aim is to empower the University to fulfill its mission and pursue its ambition for unrivalled excellence, sustainability and global impact.

The Campus Veritati project is of paramount importance for the development of Universidade Católica Portuguesa – with a renewed holistic vision, it will be a space of convergence, reshaping the experience that the university provides, integrating knowledge and stimulating impact-oriented research.
